French Door Refrigerator Specifications

- Product Shipping Weight (approx.) - 365 Lbs.
- An electrical supply with grounded three-prong receptacle is required. The power supply circuit must be installed in accordance with current edition of National Electrical Code (NFPA 70) and local codes & ordinances.
- Voltage Rating - 120V / 60 Hz / 15 or 20 Amps
- Connected Load (kW Rating) @120 Volts = 1.02 kW
- Amps @ 120 Volts = 8.5 Amps
- Always consult local and national electric & plumbing codes.
- Floor should be level surface of hard material, capable of supporting fully loaded refrigerator.
- When installing refrigerator adjacent to wall, cabinet or other appliance that extends beyond front edge of unit, 20" minimum clearance recommended to allow for optimum 120° to 180° door swing, providing complete drawer / crisper access and removal. (*Absolute 4-1/2" minimum clearance will ONLY allow for 90° door swing which will provide drawer / crisper access with restricted removal.*)
- To ensure optimum performance, avoid installing in direct sunlight or close proximity to range, dishwasher or other heat source.
- For proper ventilation, front grille MUST remain unobstructed.

- Recess electrical outlet when possible.
- Water recess on rear wall recommended to prevent water line damage.
- Water Pressure - Cold water line must provide between 30 and 100 pounds per square inch (psi).
- Copper tubing with 1/4" O.D. recommended for water supply line with length equal to distance from rear of unit to household water supply line plus 7 additional feet. Optional Water Supply Installation Kits available.
- Adjustable front rollers to assist with door alignment.

“Built-In Look” Specifications

- Minimum opening of 70-1/4" H x 36" W x 28-7/8" D required to allow for ease of installation, proper air circulation, and plumbing / electrical connections.
- Remove all wall / floor molding prior to installation.

Note: For planning purposes only. Refer to Product Installation Guide on the web at frigidaire.com for detailed instructions.
